Abstract: The volatile components of the leaf oil of *Evodia calophylla* Guill. from the Nghean province, Vietnam were analyzed by GC and GC/MS. Thirty-three compounds, comprising 95.2% of the GC profile of the oil were identified. The three major constituents were α -pinene (9.2%), (Z)- β -ocimene (17.5%) and (E)- β -ocimene (46.6%). © 2009 Allured Business Media.

Author Keywords: (E)- β -ocimene; (Z)- β -ocimene; Essential oil composition; *Evodia calophylla*; Rutaceae

Index Keywords: Vegetable oils; Chemical compositions; Essential oil composition; *Evodia calophylla*; Rutaceae; Viet Nam; Volatile components; Essential oils; *Evodia*; Rutaceae
