**Abstract:** The leaf oil of *Alchornea tiliifolia* (Benth.) Muell. produced from plants growing in Pu Mat National Park, Nghean province, Vietnam was prepared by steam distillation. The oil was analyzed by GC and GC/MS. A total of 45 compounds were identified, of which  $\beta$ -pinene (31.4%), linalool (17.0%) and  $\beta$ -caryophyllene (10.7%) were found to be major components. © 2009 Allured Business Media.

**Author Keywords:**  $\beta$ -caryophyllene;  $\beta$ -pinene; *Alchornea tiliifolia*; Essential oil composition; Euphorbiaceae; Linalool

**Index Keywords:** Distillation; Parks; Plutonium; Vegetable oils; Volatile organic compounds; *Alchornea tiliifolia*; Essential oil composition; Euphorbiaceae; Linalool; Steam distillation (SD); Viet Nam; Volatile constituents; Essential oils; *Alchornea*; *Euphorbia*; Euphorbiaceae
